

TEXAS A&M UNIVERSITY

College of Medicine

MD Plus Program

MD/MASTER OF PUBLIC HEALTH

Quick Facts

- With a knowledge in public health, you will gain an understanding of all factors that influence the health of populations
- Accelerated program (12 months) with the following concentrations available: Health Promotion & Community Health Sciences; Occupational Health & Safety; Environmental Health
- All those offered admission are automatically considered for scholarship opportunities from the College of Medicine
- MCAT is accepted; GRE not required
- Application deadline: April 5, 2021

MPH Curriculum

The degree program is 45 credit hours, including nine hours in a newly designed, immersive curriculum. You will receive hands on experience from public health and medical experts about the determinants of health, applied methods, epidemiology of diseases, policy and ethics, and interventions. Courses are taught using a case management approach to further develop your investigative skills and leadership potential. All students complete a practicum (internship) with an opportunity to apply the concepts, tools and strategies in the field.

Career Options

- Occupational Medicine Physician
- Medical Officer (medical expert), FDA
- Vaccine Researcher, NIAID
- Medical Epidemiologist, CDC
- Forensic Pathologist
- Biodefense Researcher
- Preventive Medicine Officer, Army

Student Profile

Laura Oscar, MPH Class of 2016, MD Class of 2020, is pursuing urology as a specialty. She also wants to be involved in health administration and policy, specifically pertaining to health disparities. "My main goal is to become an advocate for not only my patients but anyone in need of health care, and one day inspire future physicians and residents to have the same passion for the communities they serve. The MD Plus Program gave me the knowledge and credentials I need to make this happen."
