

## MD/MS IN MEDICAL SCIENCE

### Quick Facts

- MS program is condensed to 12 months
- Dual mentors - basic scientist & clinical scientist - to enhance the medically-related research project
- Flexible curriculum allows the program to align with student's scientific interests
- All those offered admission are automatically considered for scholarship opportunities from the College of Medicine
- MCAT is accepted; GRE not required
- Application deadline: April 5, 2021

### Curriculum (32 credit hours)

- Topics in Clinical Research
- Responsible Conduct of Research
- Communication in Science & Engineering
- Statistics in Research
- Foundations in Biomedical Informatics
- Journal Club
- Electives
- Thesis Research

### Career Options

- Clinical, Translational & Basic Research
- Leaders in Medical Subspecialties

### Student Profiles

**Sasha Howell, MD/MS** in Medical Science Class of 2020, knew she wanted to pursue research in neuroscience before she entered medical school. "The MD Plus Program was a perfect opportunity to allow me to expand my research interests and publish research articles at the same time. If you know you want to enter a competitive specialty, this is the track for you!"

**Tyler Heimdal, MD/MS** in Medical Science Class of 2020, plans to go into orthopedic surgery. Tyler considers his decision to join the MD Plus Program the single best decision he has made related to his education. It has allowed him to work directly with surgeons, researchers, and engineers at the Houston Methodist Department of Orthopedics & Sports Medicine. "The program has given me more than an extra degree and research experience. It has given me a team of mentors and advisors who will continue to guide me into my career."
