

## Andrew Pack

MD + MPH

Hometown: Colorado Springs, CO

Undergraduate Institution: UCLA

Undergraduate Degrees: BS in Physiological Science

### Why do you want to be a physician?

I want to be a physician so that I can live a lifetime of healing and contributing to the well-being of others.

### Why did you choose Texas A&M College of Medicine?

I chose Texas A&M College of Medicine because we have the best support in the world here. Our faculty work tirelessly to help us become well-rounded, compassionate, mission-driven people and future physicians.

### Why did you choose to pursue a graduate degree in addition to the MD?

Physician mentors who pursued additional public health degrees have lives and careers that I admire. I am glad I pursued the public health degree because it let me start early to build my community and tribe at Texas A&M and I learned so much in the program that I will take with me into my next stage.

### What are your career goals and how do you feel the MD Plus Program will help you?

I hope to pursue a career that spends the majority of my life being a clinician, but also finds ways to teach and pursue global health work. I believe the MD Plus Program has set me up to pursue these goals.
