

Thursday, October 29

Jeff Kapler & Sig Musser

“Genome-wide analysis of replication initiation in *Tetrahymena*”, By Geoffrey Kapler, Professor and Head, Molecular and Cellular Medicine, TAMU,
“Investigating Nuclear Pores and Macromolecular Condensates via Super-Resolution Single-Molecule Microscopy”, By Siegfried Musser, Professor and Associate Head, Molecular and Cellular Medicine, TAMU

Thursday, November 5

Zhigang Xie

(host: Vytas Bankaitis)

“A convergent extension model of interkinetic nuclear migration in neural stem cells of mammalian brain”, Research Assistant Professor, Molecular and Cellular Medicine, TAMU

Thursday, November 12

Carl Gregory & Fei Liu

“Mimicry of the osteogenic niche and efforts to generate a synthetic bone autograft”, By Carl Gregory, Associate Professor, Molecular and Cellular Medicine, TAMU, “Roles of Hedgehog signaling and resident macrophages in the restoration of salivary gland function following radiotherapy”, By Fei Liu, Associate Professor, Molecular and Cellular Medicine, TAMU

Thursday, November 19

Student/Postdoc Talks

“Using population-based mouse model to identify genetic, epigenetic and dietary influences on inter-individual variability in susceptibility to lead (Pb) poisoning”
By Danila Cuomo from Threadgill lab, “NF- κ B Inducing Kinase (NIK) Regulation of Adipogenesis and Adipocyte Remodeling in Obesity” By Kathryn (Casey) Pflug from Sitcheran lab

Thursday, December 3

Kuang-Lei Tsai

(host: Jun-yuan Ji)

“Cryo-EM structures of transcriptional Mediator complexes”; Assistant Professor, Department of Biochemistry and Molecular Biology, McGovern Medical School, UT Health Science Center at Houston

Thursday, December 10

Hua Bai

(host: Jun-yuan Ji)

“Peroxisome-mediated liver-heart communication during *Drosophila* aging”, Assistant Professor in the Department of Genetics, Development, and Cell Biology at the Iowa State University.
