

Name: Megan Mitchell

Class: 2025

Clerkship Campus: Round Rock

Conference: American Epilepsy Society (AES) Annual Meeting

Research Poster: Disparities in Emergency Room Care for Children Presenting with Seizure

Mentor: Kristina Julich, M.D.

Awardee Student Testimonial

I was so grateful to have the opportunity to present my research at the American Epilepsy Society Annual Meeting in Nashville, TN. Dr. Kristina Julich and I have been working on this project since the summer of 2022 and were excited to share it with researchers in the field. I was able to network with physicians in the field of child neurology which is one of my specialties of interest. I was also able to meet with my mentor's entire child neurology practice and hope to have gained additional mentors through this interaction. I would like to thank the Office of Medical School Research Education for granting me the funding necessary to attend this conference. I know that the connections I made and experience I gained will help propel me forward in my career.
